- Javascript was used for photo gallery and photo presentation.

EDUCATION

B.S. Computer Science - Purdue University (Indianapolis)

August 2012 - May 2016

GPA : 3.24

Graduating Project - Using data mining techniques, I created a model to determine whether a candidate for a high school teaching job would be a wise selection. Using DBSCAN to classify the candidates based on a feature set and K-Nearest Neighbors for classifying both in Java, a user was able to enter candidate features and classified as a strong or weak candidate.
